

Updating your NMS Calendar

At the start of January you will need to configure your NMS calendar for the year ahead. Radio buttons allow you to view and edit calendar shifts across a 3 year period. You will need to set your shift times for the new year, which will be 2010 or 2011, depending upon how far in advance you have already set your calendars.

What is Seiki NMS?

Seiki NMS is designed for companies looking to maximise productivity and get the most from lean initiatives, by utilising a complete shop floor system to electronically distribute and collect manufacturing process data.

- Fast and efficient shop floor communication
- Full audit trail of file transfers
- Centralised storage and display of all manufacturing data
- Eliminate manual paper based data collection
- Factory wide distribution of work queues
- Remote live views of individual machine status and activity
- Graphic display of machine utilisation and lost productivity trends

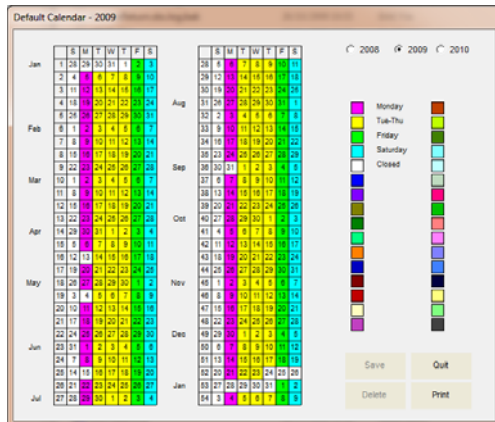

How to update your NMS Calendar

To update the Seiki NMS calendar run the program *calendar.exe* which you can find from the Windows Start button. Then navigate through the following:-

- > Programs
 - > All Programs
 - > Seiki Systems NMS
 - > Office Tools
 - > Calendar

Select the Default calendar or Machine Specific Calendar as required.

If it has not already been done, it is possible to configure your standard days by double clicking the coloured boxes on the right hand side of the screen and give them a name or reference. Now you can allocate standard working days in the year by clicking the required day and using the spray can pointer to select single days or blocks with the spray can.

If you are experiencing any problems updating your calendar or require technical assistance then please do not hesitate to contact the Seiki Support Desk, Tel: 01273 680411 between 08.30 and 17.00, Monday to Friday. Alternatively, email: support@seikisystems.co.uk
