

## Example Return on Investment

Increased productivity	Ⓐ	5%
Machine rate/hour	Ⓑ	£65
Hours per day	Ⓒ	15
Days per year	Ⓓ	220
Number of machines	Ⓔ	20
Savings per day	Ⓕ	$A \times B \times C \times E = \text{£/day}$
Savings per year		$F \times D = \text{£/year}$

Savings per day  $0.05 \times 65 \times 15 \times 20 = \text{£}975$

Savings per year  $\text{£}975 \times 220 = \text{£}214,500$
